About Us

Aabiral was founded in 2015 by a group of experienced engineers, technicians and management team with an aim to provide engineering service to general public and organizations.

Currently, there is a vacuum for engineering services for general public which has lead to numerous socioeconomic problems. We want to overcome this situation by providing efficient and economic engineering solutions. Our core value is to focus on development of robust infrastructure for the satisfaction of our clients.

We aim to be an efficient engineering and construction organization.
